

DIPLOMA IN CYBERSECURITY

Duration: 6 months

CHAPTER 1

Basics of Linux operating system

Installation and configuration of Kali Linux OS

Basic Linux commands

File and System Management

Networking Commands

Data Manipulation Commands

Privilege escalation

Summary

CHAPTER 2

Introduction to Cybersecurity

Motives of Information Technology

Goals of IT

Various types of Attacks

Summary

CHAPTER 3

Information Security Overview

Cybersecurity Concepts

Information Security Laws and Standards

Summary

CHAPTER 4

Footprinting

What is Footprinting, Reconnaissance

Whois Footprinting

Website Footprinting

Email Footprinting

Summary

CHAPTER 5

Scanning Concepts

Network Scanning concepts

Discovery scans, Port scans

Scanning tools

Nmap

Network Proxies

Summary

CHAPTER 6

Network Enumeration

What is Network Enumeration

SMB_NetBIOS enumeration

Website enumeration

What is vulnerability scanning

Scanning with OpenVAS

Summary

CHAPTER 7

System Security

System security concepts

Common OS exploits

Metasploit

Meterpreter

Keylogging and Spyware

Entering in Windows

Passwords attacks

Password cracking tools

Hiding Data

Summary

CHAPTER 8

Viruses and Malware

Viruses, Trojans and Malware

Malware detection

Malware Analysis

Summary

CHAPTER 9

Sniffing Technology

Network Sniffing

Sniffing tools

Sniffing HTTP with Wireshark

ARP and MAC attacks

Summary

CHAPTER 10

Social Engineering

Social Engineering Attacks

Phishing for credentials

Identity Theft

Summary

CHAPTER 11

Denial Of Services

DoS/DdoS Concepts

DDoS Case Study

Botnets

Summary

CHAPTER 12

Session Hijacking Concepts

Hijack a Telnet connection

Evading IDS, Honeypots and Firewall

Use Social Engineering to Bypass a Windows Firewall

Summary

CHAPTER 13

Web Server Security Concepts

Web Server Atta

Web Server Attack Methodology

Web Application concepts

Attacking Web Apps

Web Application Security

SQL Injection Concepts

Summary

CHAPTER 14

Wireless Security

Wireless Encryption

Wireless Threats, Wireless Attacking Tools

Cracking WEP

Wireless Security Tools

Mobile device overview

Mobile platform attack vectors

Exploiting Android OS

Mobile Security Guidelines and Tools

Summary

CHAPTER 15

IOT (Internet of Things) & OT

IoT Vulnerabilities and Threats

IoT Attacks, IoT Security

OT (Operational Technology) Concepts

OT Attacks

Summary

CHAPTER 16

Cloud Computing

Basics of cloud computing

Container Technology

Cloud Security

Summary

CHAPTER 17

Cryptography

Encryption Algorithms

Cryptography Tools

Email encryption

Disk encryption
Cryptanalysis and Hashing
Cryptography Attack Countermeasure
Cryptanalysis Tools
Summary

CHAPTER 18

Network Penetration Testing

Introduction to Penetration Testing
Types of Penetration Testing
Pentesting Services
Penetration Testing Phases
Pre-Engagement Actions
Exploitation (Automated)
Password Cracking
Red Team Vs Blue Team Operations
Advanced Network Pentesting
Manual Exploitation of System Vulnerabilities
Post-Exploitation
Privilege Escalation (Linux and Windows)
CyberKill Chain, MITRE ATT&CK
Penetration Testing Standards
OWASP, SANS25, PTES and OSSTMM
Summary

FINAL EXAM
